

University: Univerzita Komenského v Bratislave - Comenius University Bratislava	
Faculty: Faculty of Management	
Course unit code: new subject	Course unit title: Methodology of Urban Regeneration
Mode of delivery, planned learning activities and teaching methods: Teaching methods: On-site method (75 %), distant learning (online) (25 %) Allocation of teaching hours: lessons / 1 hour + exercises / 1 hour Allocation of teaching hours weekly: 2 hours During the study level: 26 hours (13 weeks)	
Credits allocated: 3	
Recommended semester: 4th	
Level of study: 2.	
Prerequisites for registration: enrolment in the trajectory courses in parallel	
Advised prerequisites (noncompulsory):	
Assessment criteria: Continuous check of the progress of the seminar work, the condition for admission to the exam is passing the checks with a minimum passing grade in the three specified terms of the semester. Completion of the subject: exam (written, success criterion = min. 56%). Specific classification degrees are awarded based on the total number of percentages/points obtained, which reflects the degree of success in completing the subject. The final assessment of the student is given by the current study regulations.	
Assessment methods: Continuous assessment/admission to the exam is conditional on active participation in lectures and exercises. The final student grade is determined by the evaluation of the work in the exercises (weight 40%) and the written exam (weight 60%) with the result of the written exam, with a success rate of at least 56%. Ratio between the interim and the final evaluation is 40:60.	
Learning outcomes: To convey basic knowledge about the approach, methodologies and typologies of urban distressed areas and in the context of spatial development policy in the dimension of the settlement and region, the state and the EU and in the dimensions of cross-sectional and sectoral spatially relevant socio-economic planning activities with an emphasis on activating potentials and their values in current transformation processes.	
Course content: The basis of the typology of urban brownfields from the perspective of urban and architectural theory and from the perspective of new approaches to the issue of urban regeneration The role and function of brownfields in cities and settlement structures and their typology. Historical determinants of the development of urban brownfields from the perspective of national specifics. Brownfields as one of the forms of urban brownfields, the state of their physical and social environment. Economic and managerial aspects of urban regeneration Legal and planning aspects of urban regeneration Social and cultural aspects of urban regeneration Case studies of successful urban regeneration practice in the EU and the Slovak Republic. Seminars: Methodology of preparing a regeneration project on a problematic example of a territory
